jamwalab.me

Summary:

- Full stack web developer with certificate from University of Toronto, and seven years of experience in Supply Chain.
- Experience building scalable web applications, responsive web UI, RESTful web services, and database management.
- Programming enthusiast, with a strong ability to design, build, and maintain websites from ideation to production.
- Good communication skills, and the ability to work individually and independently, within a team, and across teams.

Professional Experience:

A.P. Moller - Maersk

09/2018 - Present

Associate, Mississauga, ON, Canada

Performing as Custom House Broker, designing, and developing shipment management applications using VBA macros, React, MySQL, Restful API, Node, Express, Handlebars, Axios, JavaScript, HTML, and CSS.

- Developed web tracker that helped in reducing the shipment tracking time by half, allowing bulk search of containers.
- Designed VBA macros to automatically track shipments for customs release and update custom clearance status.
- Built VBA macros to QA data entries filed with Canadian customs daily to meet customer requirements.

APL Logistics

07/2016 - 06/2018

Senior Analyst, Gurgaon, India

Performed as a data analyst, managed multiple databases, and generated web reports for analysis.

- Developed and maintained trade compliance databases for multiple countries using MySQL, XML, and Excel.
- Built VBA macros to compile data from multiple databases for ETL and analytics, reducing the overall time by 80%.
- Worked in an Agile scrum development cycle to assist with designing and testing the trade compliance website.

Molex

08/2015 - 06/2016

Analyst, Bangalore, India

Gathered data for product classifications and update SAP databases.

- Maintained products HS code database on SAP system for various countries.

Aptean

02/2014 - 08/2015

Analyst, Bangalore, India

Performed as data analyst. Designed, developed, and tested Global Trade Management web application and database.

- Designed backend process to capture trade compliance data from customs websites of different countries.
- Maintained Global Trade Management (TradeBeam) databases.
- Worked in a peer-reviewed development cycle and performed code testing.

Academic Projects:

[Booklyst](#) (MongoDB, Express, Node, React, GraphQL, Web Scraping, JavaScript, HTML, CSS) / [Github](#)

- Generates an estimated time of arrival for shipments arriving at the port and moving on the rail.
- Allows users to request eta of shipping containers in bulk and display results in a table.

[Smart Fix](#) (HTML, CSS, Node, Express, MySQL, API, Handlebars, JavaScript) / [Github](#)

- Connects customers with service providers for household repairs and maintenance.
- Allows users to register as a customer or service provider, with different functionality based on user type.

[Calorie Tracker](#) (HTML, CSS, JavaScript, API) / [Github](#)

- Enables users to set calorie targets, track daily calorie consumption, and show progress in graph format.
- Users can search food items for calorie data and recipes or manually add consumption data.

Education:

Full Stack Web Development

University of Toronto, Toronto, ON, Canada

08/2021

Bachelor of Engineering - Electronics and Telecommunication

University of Mumbai, Mumbai, India

06/2009

Post Graduate Diploma in Management

Birla Institute of Management Technology, Greater Noida, India

06/2013

Technical skills:

Cloud Technologies	AWS EC2, AWS S3, AWS RDS, AWS LAMBDA
Web Frameworks	JQuery, React, Node, Express, Handlebars, Bootstrap
Web Technologies	GraphQL, REST, JSON, AJAX, XML
Programming Languages	JavaScript ES6+, Python, Visual Basic Application (VBA), HTML5/CSS3
Programming Concepts	Data Structures, OOP, Design Patterns, PWA, DOM
Databases	MySql (SQL), MongoDB (NoSQL)
Operating Systems	Linux (Ubuntu), Windows, Mac
MVCCs'	Git

Certifications:

Certified AWS Cloud Practitioner

07/2020
